DETAILED ACTION

Election/Restriction

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-3, 5-24, 26-44, 46, 53-55, drawn to monitoring and interrogating user generated data, are classified in class 709, subclass 225.
 - II. Claims 47-50, 4, 25, 45, drawn to parsing and converting monitored data, are classified in class 709, subclass 246.
 - III. Claims 51-52, drawn to monitoring and interrogating data in node clusters, are classified in class 709, subclass 224.
- 2. The inventions are distinct, each from the other because:

The claims in Group I involve steps to monitor a computer's data, while the claims in Group II specifically involve converting monitored data, which is classified in a different class from Group I and the claims in Group III involve monitoring a network's data, which is classified in a different subclass from Group I and II.

Application/Control Number: 09/746,604 Page 3

Art Unit: 2141

- 3. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as to control computer access to data. In the instant case, invention II has separate utility such as to convert monitored data. In the instant case, invention III has separate utility such as to monitor data within the whole network. See MPEP § 806.05(d).
- 4. Claims 4, 25, 45 link(s) inventions I and II. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claims 4, 25, 45. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Application/Control Number: 09/746,604

Art Unit: 2141

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination

purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and the searches

required for Group I is not required for Groups II or III, restriction for examination purposes as

indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include an

election of the invention to be examined even though the requirement be traversed (37

CFR 1.143).

Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephan Willett whose telephone number is (703) 308-5230. The

examiner can normally be reached Monday through Friday from 8:00 AM to 6:00 PM.

9. If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Rupal Dharia, can be reached on (703) 305-4003. The fax phone number for the

organization where this application or proceeding is assigned is (703) 872-9306.

10. Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the receptionist whose telephone number is (703) 305-9605.
